

Amendments to the Specification:

Please replace the paragraph on page 6, beginning at line 24, with the following amended paragraph:

The pet coat 29 is attached to any preexisting harness 32 by a harness attachment 33 such as, for example, a Velcro® buckle 33 as shown in figure 8. A side or element 33(a) of the Velcro® buckle is placed over a harness strap 38 of the harness 32 and a second side or element 33(b) of the Velcro® buckle is attached ~~thereupon~~ to the first side or element 33(a). Consequently, the harness attachment 33 inhibits substantial lateral movement of the pet coat 29 or pack across said harness while allowing some movement along a longitudinal length of the harness. An opening 34 is provided in the pet coat 29 so that a leash attachment portion of the harness 32 may be exposed and used by the owner. As a result, the pet coat 29 is secured to the independent and separate harness 32 as in figure 9. The pet coat 29 is interchangeable with various existing harnesses. As such, a pet can be easily dressed with the pet coat 29 because it can be easily attached to the same harness that a owner might use to put on a leash.
